

Did you know ...

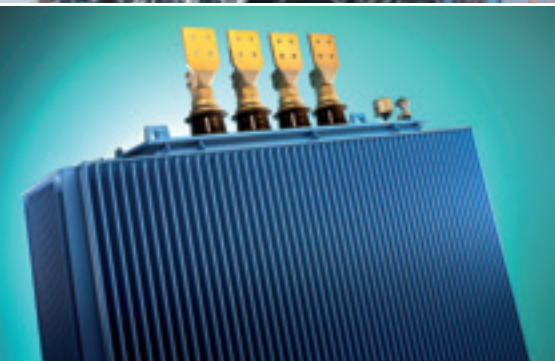

Smart solutions.
Strong relationships.

...CG Power Systems is a global supplier to the wind energy sector with its SLIM® and Bio-SLIM® transformers – over 14 GW and 6,000 installations worldwide – and compact substations, both on and offshore.

...CG Systems Division (as a partner in the BOSS JV) is responsible for the main electrical works, including the grid connection of the Belwind offshore windfarm, located on the Blijgh Bank, 50km off the coast of Zeebrugge (Belgium).

With over 60 years of experience in the energy sector, CG Power Systems is an established manufacturer of high-performance transformer solutions for onshore and offshore installations, and a strong competitor in the market of switchgear, substations, integrated solutions and services.
